M-ACCESS User's Manual

January, 2025 Ver. 2.0

Introduction

This system centrally controls and manages, on the cloud, air conditioners (outdoor and indoor units) and heat source units (Air to water heat pump , CO_2 condensing unit and Air to water heat pump chiller) installed at each site.

- "Site" indicates a segment of a building.
- Click [MY SITES] on the menu bar at the top of the screen to move to this screen.
- "Site" displays the following items:
 - ①Site name and city name
 - ②Power consumption of the entire site

This indicates the amount of power consumed in the entire site from midnight to the present time of the same day.

③Number of units in operation among the units registered in the site

1st icon from the top indicates the air conditioner and 2nd icon is for Hyozan and Hydrolution PRO. 3rd icon is for Q-ton.

The numbers on the right indicate (number of units in operation) / (number of registered units).

(4) Authority assigned to the logged-in account for each site

- If you click (5) and select a site, the operation screen shown in (1) is displayed. For details on the specifications of the operation screen, refer to [1.19. Operation Screen].
- If your subscription payment is not completed or a payment error occurs, an exclamation mark icon are displayed as shown in (6). Click icon (6) to move to [2.14. Subscription Payment Screen].
- If an error occurs, the error icon and the number of units exhibiting abnormalities are displayed as shown in ⑦. The error details can be viewed on [1.26. Remote Control] and [1.28. Q-ton/Hyozan/Hydrolution PRO Data Display Screen].
- Click [DETAILS] in (8) to move to [1.6. Overview Screen].
- Click (9) to move to [1.5. Add site Screen].
- If you click the filter icon (10), you can change the number and order of the site's display, as well as adding filters.

1.5. Add site Screen

This screen is used to add a site.

The search procedure is as follows:

- Enter the target period in (1). 1.
- The maximum search range is 1 year.
- 2. Select the category of the target unit in (2).
 - (Air conditioner / Q-ton / Hyozan / Hydrolution PRO) - [Unit]
 - [Filter] (For Hyozan)
 - (For Air conditioner) - [Group]
- Select the target unit in ③. 3.
- Click [REQUEST] in ④. Each request will be shown in "File list" at the bottom of this page. 4.

After sending above request, operational data is going to be prepared in our server which will take some moments. When it is completed, you can download it by clicking on [DOWNLOAD] in ⑤. Clicking on [CANCEL] will abort the process.

Note

- Download data request is limited as a maximum of 10 requests per user.

- Download data will be automatically removed after 24 hours from its generation.

Click [SAVE] in ②, the text can be saved.

1.13. Yearly calendar Screen

This screen is used to configure the yearly calendar for use in schedule function. Energy saving control function also refer to this schedule for its control.

Yearly calendar

Part of (1) shows current yearly calendar settings with the indication of the date type by the background colours.

- Weekday
- Holiday
- Special day 1
- Special day 2

• Click the edit icon in the right top corner will display Calendar setting dialog.

Standard calendar setting

You can set date types for each day based on the day of the week or specific date.

- * "Specific day setting" always supersede "Day of week setting".
- Part of ② shows the current day of the week settings. Click on the edit icon in the right top corner will display the setting dialog.
- Part of ③ shows the current specific day settings. Click [ADD] to display the setting dialog.
- You can edit or delete the registered specific day setting from the icons shown when clicking on or hovering over that setting item.

1.16. Energy saving control Screen

To enable energy saving control, set "Active" and complete the following steps. Energy saving control will not start until 4 weeks of operation results are observed.
 Please follow the steps below to configure the setting: 1. Set "Active" by toggle button in ①. - [Start Date] [Start Date] shows the expected date when the actual control can be initiated after collecting the operation data of your building for certain period. Once it has started, [Start Date] will display the date when control was initiated.
 2. Set the annual power consumption target in 2. The annual power consumption target is only applicable to target air conditioners set in 7. If you want to change the annual power consumption target after this control has started: Set "Inactive" and press "APPLY" button. Set "Active" with new target value and press "APPLY" button. Otherwise, new target value will not be taken into account.
 Determine the season setting in ③. Determine the cooling (blue) / heating (orange) season by slide bar. When you click on the icon, it will switch between the seasons (cooling/heating) within the range defined by the slide bar.
 4. Set the monthly target in ④. Please set the monthly target power consumption by using slide bar below. Annual power consumption target (set in ①) will be distributed for each month. Air conditioners will be controlled based on each month's target value. 1. Press "CALCULATE MONTHLY TARGET" button to calculate default monthly target. 2. Adjust monthly target manually. (Optional)
 Set the correction coefficient by date type in ⁽⁵⁾. In order to estimate power consumption for each day, please enter correction coefficient for each date type. Weekday power consumption is considered as reference (100%). Please use "calendar setting" to specify the date type of each day.
 6. Set the temperature difference to suspend control in ⁽⁶⁾. Energy saving control will be suspended for the units where the difference between room and setting temperature is more than the criteria. Please consider the balance between comfort and energy saving target. Cooling : Room Temperature - Set Temperature Heating : Set Temperature - Room Temperature
 Select the target air conditioners to be controlled in ⑦. Please make sure the selected units are connected to the outdoor unit supporting energy saving control function. <u>Note</u> Outdoor units with a voltage setting value of "0V" cannot be controlled. Please make sure the correct voltage value is set.

 $\begin{array}{c} 8. \end{array}$ Click on [APPLY] in 8 to apply the settings. \end{array}

This screen is used to view the demand control settings.

The demand control function is a feature that controls the operation of air conditioning units based on external input signals from a demand controller connected to the gateway. The demand control level is determined based on the combination of external input terminals (DI4/DI5) as shown in the table below.

		D	15
		OFF	ON
אוס	OFF	None	Level 2
D14	ON	Level 1	Level 3

Display the current demand level of each gateway in ①.
 Please note that the multiple external demand controllers are required when multiple gateway are used.

- Display the current settings of the indoor unit and outdoor unit in numbers (2) and (3).
 - Mode (Active / Inactive)
 - Controlled units
- If you click the gear icon in 3 and 5, the following buttons are displayed:
 - [Edit]
 - You can configure the settings for demand control.

<u>Please note that the demand control settings cannot be changed while the demand control is in active.</u>

The indoor unit demand control performs the following control according to the demand level. Note that the following control parameter cannot be changed from the remote controller after the indoor unit demand control started.

- Level 1 : Adjust temperature
- Level 2 : Change the operation mode to "Fan mode"
- Level 3 : Power off the unit

Please follow the steps below to configure the setting:

- 1. Set "Active" by toggle button in ①.
- 2. Set the temperature to be shifted in ②.
- 3. Select the target air conditioners to be controlled in ③.
 - The target units for each demand level are as follows:
 - Level 1 : Only the units set "level 1"
 - Level 2 : Units set "level 1" and "2"
 - Level 3 : Units set "level 1","2","3"
 - Units set "None" are not controlled.
 - The specified interface unit (Interface type : "Other") can only be set to Level 3.
- 4. Click on [SAVE] in ④ to apply the settings.

This graph screen displays energy amount and COP. This screen is for the Q-ton and Hydrolution PRO.

These specifications are basically the same as [1.24. Power Consumption Graph] and [1.25. Temperature Graph.
The energy amount is represented as a bar graph, while the COP is displayed as a trend
graph.
②Graph range
The following settings are available:
[Day]
The data, aggregated on an hourly basis, will be displayed for a full day.
[Week]
The data, aggregated on a day basis, will be displayed for a week.
[Month]
The data, aggregated on a day basis, will be displayed for a month.
[Year]
The data, aggregated on a month basis, will be displayed for a year.
[10 years]
The data, aggregated on a year basis, will be displayed for 10 years.

By clicking the "COMPARISON" button for each graph, a comparison graph will be displayed.

Display the graph for the comparison date in addition to the graph for the original date. Comparison graph has the following items: ① Original date

2 Comparison date

Clicking on the "x" icon will end the display of the comparison graph.

③ Comparison legend

In addition to the legend of the original graph, display the comparison legend.

Comparison legend represents the data of the comparison data selected in 2.
1.30. Hyozan Group Layout Screen

This screen is used to view the layout of the Hyozan indoor units belonging to the group.

Multi-view mode (for 2 groups)

Multi-view mode (for 3 or 4 groups)

1.30. Hyozan Group Layout Screen

In this screen, the layout of the Hyozan indoor units is displayed, along with the operating status and temperature data of each unit.

In Single View mode, the layout of each group is displayed. It is also possible to switch groups automatically.

In Multi View mode, up to 4 groups' layouts can be displayed simultaneously.

• ① displays the operation status of the indoor unit. Each icon in the image represents the position and operating status of each indoor unit belonging to the group. The legend is as follows:

Sta	ate
On	Off
桊	***

• Display tooltips along with the icons. The tooltips should display the following information based on the size:

-8.5 °C

5 0

- Large : Inside temp, set temp, and difference
- Medium : Inside temp, set temp,
- Small : Inside temp

- Highlight colour of the tooltips is changed according to the temperature difference. The criteria of this temperature differences should be set based on the values specified in the [2.9. Hyozan Indoor Unit Setting Screen].
- If you click an icon in ①, the following icons are displayed in addition to the details of the corresponding unit state on the operation screen on the right:
 [Line graph icon]

Click this icon to display [1.25. Temperature Graph] of the unit.

- By clicking on ②, you can select the group to be displayed.
- By clicking on ③, you can switch between display modes (Single view/Multi-View).
- By clicking on the gear button in ④, the settings dialog will be displayed.
- Clicking on (5) will display the current layout screen in a separate tab.
- In Single view mode, you can change the group to be shown by clicking on the arrow icon and the dot icon in (6).

1.30. Hyozan Group Layout Screen

Display settings dialog

You can configure the display settings for the layout. The available settings may vary depending on the display mode.

Only for Single view mode

• When you toggle the switch in ① to ON, the Auto switching feature for the layout will be enabled.

75

- You can set the screen switching timeframe in (2).(10 to 60 seconds)
- You can select the size of the tooltips in ③.

Only for Multi-view mode

- You can select the size of the tooltips in ④.
- You can select up to 4 groups to be displayed in (5).

Click on [OK] to apply the settings.

Click the gateway name in 1 to move to [2.4. Gateway System Selection Screen]. For each gateway, the following items are displayed as shown in 2. [Activation status] Activation status of gateway [Payment status] Payment status of the subscription [Last connected] Last communication time [IP address] IP address [Gateway version] Software version [Gateway type] Current communication type (Superlink(Previous), Superlink(New), or Remote terminal) [Units] Number of air conditioners and Q-ton/Hydrolution PRO units registered in the gateway Number of Hyozan units registered in the gateway [Hyozan units] (Displayed only for registered Hyozan units) To add a gateway, click [ADD GATEWAY] in ③, and enter the new gateway name and activation code(*). Then, start activation. (*)Please contact your dealer or distributor to get the activation code.

Add gateway		
Please enter the name of new gateway and activation code. New gateway name	_	
Activation code		
	CANCEL OK	

2.1. Gateway Setting Screen

 Click this button to delete the gateway. * NOTE Deletion of the gateway that has an active subscription is prohibited. If you wish to delete the gateway, please cancel the next subscription payment and wait for the termination of the current subscription period. All data associated with the gateway, including operation history will be permanently deleted and cannot be restored. [Reboot] Click this button, the gateway will reboots. [Connection check] You can confirm the communication between the gateway and connected units. This function can be used before the payment for the purpose of checking communication during commissioning or service work.
Click this button to replace the gateway with having a same configuration and units' operation data associated with the current gateway. By this function, you can transfer the past operational data and device registration information. Same as gateway activation, please enter the Activation key displayed in the screen into the gateway you are replacing. [Delete]
[UPDATE] in ④ is only displayed when the gateway software needs to be updated. If you click this, the software is upgraded to the latest version, and the gateway restarts. [CONFIG UPDATE] in ⑤ is displayed only when there is a need to update the unit configuration information of that gateway (such as switching the communication type or updating unit registration). If you click this, the latest configuration information will be sent to the gateway and the gateway automatically restarts to apply the changes. If you click the gear icon in ⑥, the following three buttons are displayed: [Edit] Click this button to display the Gateway Edit dialog on the following page. [Collective setting] (only available for air conditioner) Click this button to display the collective setting dialog. By uploading a file, you can configure and/or register multiple units information which is connected to the gateway. You can also download the file of current unit settings.

2.1. Gateway Setting Screen

This is a screen under gateway activation or replacement.

BC Office Buildin	g	
		+ ADD GATEW
Gateway 003		
Gateway status	Waiting for gateway to co	onnect
Activation key	1 zaf4y	

When activation is started, the activation key in ① is displayed, and the system is placed in the gateway registration wait status for 30 minutes. Activation is completed by logging in to the gateway side in time and entering this activation key. For information on how to set up the gateway, refer to the Gateway Installation Manual.
 If 30 minutes have passed before completing activation, time-out is triggered, and the following two buttons are displayed:

 [RETRY]
 Restarts activation.
 [DELETE]
 Deletes the gateway.

 Click [DELETE] in ② to cancel the activation.

Gateway Edit dialog

(Superlink(New), Superlink(Previous) and Remote terminal)

After making changes, click the [CONFIG UPDATE] button on [2.1. Gateway Setting Screen] to reflect the changes to the gateway. _____

Collective setting dialog

Collective setting of units

Registration and configuration of the entire air conditioning system can be

completed at once by uploading the collective setting file.

The template setting file is available below.

Collective setting of units

Registration and configuration of the entire air conditioning system can be completed at once by uploading the collective setting file. The template setting file is available below.

2.2. Gateway Collective Setting Screen

Collective setting check screen

Please follow the steps below to use collective setting for complete multiple units registration and/or configuration at once. : Download the current setting file or a new setting template file in 1. 1. 2. Edit the downloaded file with the new configuration settings. Please refer to the Appendix 3 for instructions on how to edit the file. Click [UPLOAD] tab in 2 to switch screen. 3. Upload the file in ③. 4. 5. Click (4) and check the changes in a separate tab. The comparison results between the current settings and the setting of uploaded file will be displayed in a separate tab. The left side of the screen shows the current settings in (6), while the right side shows the settings from the uploaded file in \mathcal{T} . Modified sections Highlighted in Pink for the current settings and Green for the changed settings. - Added sections Highlighted in Gray for the current setting and Green for the new settings. Error message will be displayed before opening the separate tab when there is an issue on the uploaded file. 6. Click on [APPLY] in (5) to apply the settings. After opening the separate tab, the [APPLY] button becomes active.

Connection check dialog

Based on the configuration	information, you can che	ck the connection betwe
the gateway and the conne	cted unit.	
CHECK CONNECTION	*Only 10 minutes	
	only to minutes	
Unit name	Address	Connection status
Plea	se start the communicatio	on test
Plea	se start the communication	on test

2.3. Connection Check Screen

You can confirm the communication between the gateway and connected units. This function can be used before the payment for the purpose of checking communication during commissioning or service work.

Please follow the steps below to confirm the communication with the connected units:

- 1. Click [CHECK CONNECTION] button in ①.
 - By clicking the button, communication check program will be running for 10 minutes.
- Confirm the connection status in ②. The units connected to the gateway registered on M-ACCESS are displayed in a list, along with the connection status of each unit. Once the unit connection is confirmed, the Connection Status will change to "Connected". If the Connection Status stays "Not connected", please check the following items:
 Is the unit properly connected?
 - Is the gateway properly connected?
 - Is the unit information on M-ACCESS correctly configured?
 - Does the gateway have the latest unit configuration information ([CONFIG UPDATE] button clicked)?

85

·-----

2.4. Gateway System Selection Screen

This screen is used to display the number of units registered in each gateway system. The following two patterns of screens are available, which vary depending on the specified communication type:

About subscription

- The subscription fee for M-ACCESS is charged on an annual basis per gateway.
- Once the subscription fee is paid, the M-ACCESS and gateway functionalities will become active.
- After the first payment, annual fees will be automatically billed to the registered payment card.
- If you wish to update the payment information or cancel the subscription, please go to the payment portal from "PORTAL" button. Payment portal is available only for the paying user.

About Paying user

- Users who have made their first payment is considered as "Paying user".
- Only Paying users have access to the "PORTAL" and can check their payment history and make changes to their payment information.
- The authority of Paying user remains valid until the end of the subscription period.
- The authority of Paying user can be transferred to other Admin user.

Please note the following:

- If multiple gateways are connected, a separate subscription payment is required for each gateway.
- If the payment processing fails when the subscription period updates, an error will be displayed. If payment is not made within a certain period after the payment failure, the M-ACCESS and gateway functionalities will be stopped.
- Paying user cannot delete its account until the end of the subscription period. If you wish to delete your account, please transfer the authority to another Admin user.

 For each gateway, the for [Payment status] [Expiration date] 	 billowing items are displayed as shown in ①. Payment status of gateway Subscription expiration date. Annual fees will be automatically billed to the registered payment card when the current subscription period ends.

On this screen, you can make the following user settings: To make changes or initialize, please click on the gear icon next to each item. ① Company's registration country settings (only required for paying user) Register your company's country information which is required for subscription payments. If you are not making any payments, it is not necessary to set this. (2) Unit setting You can choose the unit for pressure to be used in M-ACCESS : MPa or bar. 3 Custom language settings You can download the template for custom language and upload the edited file. After uploading the custom language, please select it from the top right corner of the screen. Please refer to the Appendix 4 for instructions on how to edit the file. (4) Footer text setting You can change the company name display at the bottom left of the screen. 5 Logo settings You can change the logo at the top left and right of the screen. You can revert the changes made to the footer and logo by clicking on the "Initialise" option from the gear icon.

2.20. Delete account Screen

This screen is used to delete an account.

	Delete account
	Are you sure you want to delete your account? You'll lose access to all the building site linked to you, and the account information will be completely removed from our system. Please proceed with utmost caution.
1	Current password
	DELETE ACCOUNT

To delete an account, correctly enter the password currently used by the user in ①, and click [DELETE ACCOUNT].
If the account you want to delete is the only Admin user that is registered on a specific site, a warning is displayed, preventing you from deleting it.

It is prohibited to delete your account if you have an active subscription(paying user).
 If you wish to delete your user account, please cancel the next subscription payment and wait for the termination of the current subscription period. After the current subscription period has ended, please delete the account again.

Alternatively, you can transfer the payment authority to another user account.

Error

(*2)

- Check the connection between indoor unit and gateway.
- Check the network connection of gateway.
- Make sure you click "CONFIG UPDATE" on gateway setting screen after new units are registered.

The rules for editing configuration file used in the schedule template setting are as follows. If the uploaded file does not follow these editing rules, an error message will be displayed.

[Rules for each column]

The input rules for each column are shown in the following table.

-		
Column	Label Name	Rules for input value and content
A	Time	From "00:00" to "23:59"
В	Power	"on" or "off"
С	Mode	"auto", "cooling", "heating", "fan", "dry"
D	Set temperature	From "18" to "30" in 0.5 increments (Heating mode: From "16" to "30" in 0.5 increments)
E	Fan speed	"auto", "low", "medium", "high", "powerful"

[Other general rules for the configuration file]

- Do not change the number of columns in the CSV file.
- Do not change the label name in the first row.
- Make sure there is no blank lines.
- The schedule can have a maximum of 16 entries. The configuration file cannot exceed 17 lines (a maximum of 17 lines including the label plus 16 schedule entries).
- Do not set multiple schedules for the same time (column A).
- The time setting (Column A) is required. Furthermore, ensure that at least one of the columns from column B to column E is filled.

The rules for editing configuration file used in the Collective setting file are as follows. If the uploaded file does not follow these editing rules, an error message will be displayed.

[Rules for each column]

The input rules for each column are shown in the following table.

Column	Label Name	Rules for input value and content
A	sl-system	"1" or "2"
В	outdoor-unit-name	Equal or less than 32 characters
С	outdoor-unit-address	From "0" to "31" (Superlink(Previous) : From "0" to "47")
D	outdoor-unit-input-voltage	From "0" to "999"
E	outdoor-unit-power-supply	"singlePhase" or "threePhase"
F	master-outdoor-unit	From "0" to "31", or "None" (Superlink(Previous) : From "0" to "47", or "None")
G	indoor-unit-name	Equal or less than 32 characters
н	indoor-unit-address	From "0" to "127" (Superlink(Previous) : From "0" to "47")
I	indoor-unit-type	"AC General", "4way Cassette", "2way Cassette", "1way Cassette", "Ceiling Suspended", "Floor Standing", "Floor Standing Console", "Wall Mounted", "Duct Connected"
J	interface-unit-name	Equal or less than 32 characters
к	interface-unit-address	From "0" to "127" (Superlink(Previous) : From "0" to "47")
L	interface-unit-type	"AC General", "4way Cassette", "2way Cassette", "1way Cassette", "Ceiling Suspended", "Floor Standing", "Floor Standing Console", "Wall Mounted", "Duct Connected" "Ventilation", "Lighting"
М	interface-type	"SC-ADNA-E" or "other"
N	interface-unit-input-voltage	From "0" to "999"
0	interface-unit-power-supply	"singlePhase" or "threePhase"

Appendix 3 : Collective setting file

[Other general rules for the collective setting file]
 Do not change the number of columns in the CSV file.
 Do not change the label name in the first row.
 Make sure there is no blank lines.
• Do not enter the air conditioner settings (columns B to I) and interface settings (columns J to
O) simultaneously on a single line.
Ensure that the outdoor unit address (column C) does not duplicate within the same
Superlink system (column A).
• The indoor unit address (column G) and IF address (column K) should not be duplicated
within the same Superlink system (column A).
When configuring the indoor units connected to the same outdoor unit, please enter the
same content in columns A to F (outdoor unit settings)

132

same content in columns A to F (outdoor unit settings).

Appendix 4 : Custom language file

[NOTE] It is highly recommended to keep your custom language file for future update. It is not possible to download the updated custom language file once after uploading the file.				
[Other general rules]Do not change the label name in the first row.				
[Rules for each column] The input rules for each column are shown in the following table.				
The rules If the uplo correctly.	for editing custom language file aded file does not follow these	e are as follows. editing rules, the language file will not be applied		

Column	Contents	Rules for editing file
A	Language key	Do NOT change. Sentences using improper key will not be shown correctly.
В	Localized sentence	By default, English sentence are entered. Please overwrite the sentence to the one you would like to display on the screen.
