REMOTE CONTROL  RC-EX3A
INSTALLATION MANUAL
## 1. Safety precautions

- Please read this manual carefully before starting installation work to install the unit properly. Every one of the followings is important information to be observed strictly.
- **WARNING** Failure to follow these instructions properly may result in serious consequences such as death, severe injury, etc.
- **CAUTION** Failure to follow these instructions properly may cause injury or property damage. It could have serious consequences depending on the circumstances.
- The following pictograms are used in the text.

<table>
<thead>
<tr>
<th>Never do.</th>
<th>Always follow the instructions given.</th>
</tr>
</thead>
</table>

- Keep this manual at a safe place where you can consult with whenever necessary. Show this manual to installers when moving or repairing the unit. When the ownership of the unit is transferred, this manual should be given to a new owner.

### WARNING

- **Consult your dealer or a professional contractor to install the unit.**
  Improper installation made on your own may cause electric shocks, fire or dropping of the unit.

- **Installation work should be performed properly according to this installation manual.**
  Improper installation work may result in electric shocks, fire or break-down.

- **Be sure to use accessories and specified parts for installation work.**
  Use of unspecified parts may result in drop, fire or electric shocks.

- **Install the unit properly to a place with sufficient strength to hold the weight.**
  If the place is not strong enough, the unit may drop and cause injury.

- **Be sure to have the electrical wiring work done by qualified electrical installer, and use exclusive circuit.**
  Power source with insufficient and improper work can cause electric shock and fire.

- **Shut OFF the main power supply before starting electrical work.**
  Otherwise, it could result in electric shocks, break-down or malfunction.

- **Do not modify the unit.**
  It could cause electric shocks, fire, or break-down.

- **Be sure to turn OFF the power circuit breaker before repairing/inspecting the unit.**
  Repairing/inspecting the unit with the power circuit breaker turned ON could cause electric shocks or injury.

- **Do not install the unit in an appropriate environment or where inflammable gas could generate, flow in, accumulate or leak.**
  If the unit is used at places where air contains dense oil mist, steam, organic solvent vapor, corrosive gas (ammonium, sulfuric compound, acid, etc) or where acidic or alkaline solution, special spray, etc. are used, it could cause electric shocks, break-down, smoke or fire as a result of significant deterioration of its performance or corrosion.

- **Do not install the unit where water vapor is generated excessively or condensation occurs.**
  It could cause electric shocks, fire, or break-down.

- **Do not use the unit in a place where it gets wet, such as laundry room.**
  It could cause electric shocks, fire, or break-down.

- **Do not operate the unit with wet hands.**
  It could cause electric shocks.

- **Do not wash the unit with water.**
  It could cause electric shocks, fire, or break-down.

- **Use the specified cables for wiring, and connect them securely with care to protect electronic parts from external forces.**
  Improper connections or fixing could cause heat generation, fire, etc.

- **Seal the inlet hole for remote control cable with putty.**
  If dew, water, insect, etc. enters through the hole, it could cause electric shocks, fire or break-down. If dew or water enters the unit, it may cause screen display anomalies.
**WARNING**

- When installing the unit at a hospital, telecommunication facility, etc., take measures to suppress electric noises.
  It could cause malfunction or break-down due to hazardous effects on the inverter, private power generator, high frequency medical equipment, radio communication equipment, etc.
  The influences transmitted from the remote control to medical or communication equipment could disrupt medical activities, video broadcasting or cause noise interference.

- Do not leave the remote control with its upper case removed.
  If dew, water, insect, etc. enters through the hole, it could cause electric shocks, fire or break-down.

**CAUTION**

- Do not install the remote control at following places.
  (1) It could cause break-down or deformation of remote control.
    - Where it is exposed to direct sunlight
    - Where the ambient temperature becomes 0 °C or below, or 40 °C or above
    - Where the surface is not flat
    - Where the strength of installation area is insufficient
  (2) Moisture may be attached to internal parts of the remote controller, resulting in a display failure.
    - Place with high humidity where condensation occurs on the remote controller
    - Where the remote controller gets wet
  (3) Accurate room temperature may not be detected using the temperature sensor of the remote controller.
    - Where the average room temperature cannot be detected
    - Place near the equipment to generate heat
    - Place affected by outside air in opening/closing the door
    - Place exposed to direct sunlight or wind from air conditioner
    - Where the difference between wall and room temperature is large

- To connect to a personal computer via USB, use the dedicated software.
  Do not connect other USB devices and the remote controller at the same time.
  It could cause malfunction or break-down of the remote controller/personal computer.

---

2. Accessories & Prepare on site

Following parts are provided.

<table>
<thead>
<tr>
<th>Accessories</th>
<th>R/C main unit, wood screw (ø3.5 x 16) 2 pcs, Quick reference</th>
</tr>
</thead>
</table>

Following parts are arranged at site. Prepare them according to the respective installation procedures.

<table>
<thead>
<tr>
<th>Item name</th>
<th>Qty</th>
<th>Remark</th>
</tr>
</thead>
<tbody>
<tr>
<td>Switch box  For 1 piece or 2 pieces (JIS C8340 or equivalent)</td>
<td>1</td>
<td></td>
</tr>
<tr>
<td>Thin wall steel pipe for electric appliance directly on a wall. (JIS C8305 or equivalent)</td>
<td>As required</td>
<td>These are not required when installing directly on a wall.</td>
</tr>
<tr>
<td>Lock nut, bushing (JIS C8330 or equivalent)</td>
<td>As required</td>
<td></td>
</tr>
<tr>
<td>Lacing (JIS C8425 or equivalent)</td>
<td>As required</td>
<td>Necessary to run R/C cable on the wall.</td>
</tr>
<tr>
<td>Putty</td>
<td>Suitably</td>
<td>For sealing gaps</td>
</tr>
<tr>
<td>Molly anchor</td>
<td>As required</td>
<td></td>
</tr>
<tr>
<td>R/C cable (0.3 mm² x 2 pcs)</td>
<td>As required</td>
<td>See right table when longer than 100 m</td>
</tr>
</tbody>
</table>

When the cable length is longer than 100 m, the max size for wires used in the R/C case is 0.5 mm². Connect them to wires of larger size near the outside of R/C. When wires are connected, take measures to prevent water, etc. from entering inside.

| ≤ 200 m | 0.5 mm² x 2-core |
| ≤ 300m | 0.75 mm² x 2-core |
| ≤ 400m | 1.25 mm² x 2-core |
| ≤ 600m | 2.0 mm² x 2-core |
3. Installation place

Secure the installation space shown in the figure.
For the installation method, “embedding wiring” or “exposing wiring” can be selected.
For the wiring direction, “Backward”, “Upper center” or “Upper left” can be selected.
Determine the installation place in consideration of the installation method and wiring direction.

4. Installation procedure

Perform installation and wiring work for the remote controller according to the following procedure.
Dimensions (Viewed from front)

To disassemble the R/C case into the upper and lower pieces after assembling them once
- Insert the tip of flat head screwdriver or the like in the recess at the lower part of R/C and twist it lightly to remove. It is recommended that the tip of the screwdriver be wrapped with tape to avoid damaging the case.
- Take care to protect the removed upper case from moisture or dust.

In case of embedding wiring
(When the wiring is retrieved “Backward”)
① Embed the switch box and the R/C wires beforehand.
- Seal the inlet hole for the R/C wiring with putty.
② When wires are passed through the bottom case, fix the bottom case at 2 places on the switch box.

③ Connect wires from X and Y terminals of R/C to X and Y terminals of indoor unit. R/C wires (X, Y) have no polarity. Fix wires such that the wires will run around the terminal screws on the top case of R/C.

④ Install the upper case with care not to pinch wires of R/C.

**Cautions for wire connection**

Use wires of no larger than 0.5 mm² for wiring running through the remote control case. Take care not to pinch the sheath.

Tighten by hand (0.7 N·m or less) the wire connection.

If the wire is connected using an electric driver, it may cause failure or deformation.

**In case of exposing wiring**

(When the wiring is taken out from the “upper center” or “upper left” of R/C)

① Cut out the thin wall sections on the cases for the size of wire.

When taking the wiring out from the upper center, open a hole before separating the upper and bottom cases. This will reduce risk of damaging the PCB and facilitate subsequent work.

When taking the wiring out from the upper left, take care not to damage the PCB and not to leave any chips of cut thin wall inside.

② Fix the bottom R/C case on a flat surface with two wood screws.

③ In case of the upper center, pass the wiring behind the bottom case. (Hatched section)

④ Connect wires from X and Y terminals of R/C to X and Y terminals of indoor unit. R/C wires (X, Y) have no polarity. Fix wires such that the wires will run around the terminal screws on the top case of R/C.

⑤ Install the top case with care not to pinch wires of R/C.

⑥ Seal the area cut in ① with putty.
5. Main/Sub setting when more than one remote controls are used

Up to two units of R/C can be used at the maximum for 1 indoor unit or 1 group.
One is main R/C and the other is sub R/C.
Operating range is different depending on the main or sub R/C.

Set the “Main” and “Sub” as described at Section 8.

Advice: Connection to personal computer

It can be set from a personal computer via the USB port (mini-B).
Connect after removing the cover for USB port of upper case.
Replace the cover after use.
Special software is necessary for the connection.
For details, view the web site or refer to the engineering data.

Advice: Initializing of password

Administrator password (for daily setting items) and service password (for installation, test run and maintenance) are used.
○ The administrator password at factory default is “0000”. This setting can be changed (Refer to User’s Manual).
If the administrator password is forgotten, it can be initialized by holding down the [F1] and [F2] switches together for five seconds on the administrator password input screen.
○ Service password is “9999”, which cannot be changed.
When the administrator password is input, the service password is also accepted.

Advice

When connecting two or more FDT/FDTC to one R/C, unify the panel type either to a panel with anti draft function or a standard panel.
6. Functions and menu items of the remote control

Names and functions of sections on the R/C (Operating section)

Touch panel system, which is operated by tapping the LCD screen with a finger, is employed for any operations other than the ① Run/Stop, ② F1 ③ F2 switches.

① Run/Stop switch
- One push on the button starts operation and another push stops operation.

② F1 switch ③ F2 switch
- This switch starts operation that is set in F1/F2 function setting.

④ Operation lamp
- This lamp lights in green (yellow-green) during operation. It changes to red (orange) if any error occurs.
  Operation lamp luminance can be changed.

⑤ LCD (With backlight)
- A tap on the LCD lights the backlight.
  The backlight turns off automatically if there is no operation for certain period of time.
  Lighting period of the backlight lighting can be changed.
  If the backlight is ON setting, when the screen is tapped while the backlight is turned off, the backlight only is turned on. (Operations with switches ①, ② and ③ are excluded.)

⑥ USB port
- USB connector (mini-B) allows connecting to a personal computer.
  For operating methods, refer to the instruction manual attached to the software for personal computer (remote control utility software).

Note
- When connecting to a personal computer, do not connect simultaneously with other USB devices.
  Please be sure to connect to the computer directly, without going through a hub, etc.
Names and functions of sections on the R/C (Display)

*All icons are shown for the sake of explanation.

① Clock, Room name display
   Displays the current time and the room name.

② Icon display
   Each icon is displayed when one of following settings is going on.
   - When the demand control is effective.
   - When setting is made from the sub R/C.
   - When the central control (Optional) is running.
   - During the ventilation operation.
   - When “filter sign” is up.
   - When the Permission/Prohibition setting is made.
   - When the peak-cut timer is set.
   - When the weekly timer is set.

③ Menu button
   When setting or changing other than the following ④～⑧, tap the menu button. Then menu items are displayed, select one and set.

④ Change operation mode button
   Displays the operation mode which is selected currently. Tap this button to change the operation mode.

⑤ Change set temp button
   Displays the temperature which is set currently. Tap this button to change the set temperature.

⑥ Change flap direction button
   Displays the flap direction which is selected currently. When the 3D auto flow operation is enabled, 3D auto display will appear. Tap this button to change the flap direction.

⑦ Change fan speed button
   Displays the fan speed which is selected currently. Tap this button to change the fan speed.

⑧ Timer button
   Displays simplified contents of the timer which is set currently. (When two or more timers are set, contents of the timer which will be operated immediately after is displayed.) Tap this button to set the timer.

⑨ Select the language button
   Select a language to be displayed on the R/C.

⑩ Message display
   Status of air conditioner operation and messages of the R/C operations etc. are displayed.

⑪ F1, F2 switch function display
   Displays the function that is set for each F1/F2 switch. The function for these switches can be changed in F1/F2 function setting.
7. Main item

Main menu

Basic operation
- Run
- Stop
- Change operation mode

- Cooling test run
- Drain pump test run
- Compressor Hz fixed operation

Select the item.

⑧ Cooling test run
Cooling test run
Start

When tapping [Start], test run starts for 30 min. at 5°C in cooling.
Finish-condition of test run is follows.
Passage of 30 min/Stop the IU/Change "Set temp", "Operation mode" on the TOP screen.

⑨ Drain pump test run
Drain pump test run
Run
Stop

Drain pump can be operated independently.

The selected screen is displayed.

The selected screen is displayed.

Select the date with ▲▼ buttons, and tap the Set button.

Enter the company information.

Enter the company name using up to 26 one-byte characters and then tap the Set button. You can enter alphanumeric, Japanese Kana, Kanji, Cyrillic, or Chinese characters.

Enter the phone number of the company using up to 13 characters and then tap the Set button.
In case of Multi series (KX) models, the IU addresses registered with the auto-address setting method can be changed with this function. This function changes the OU address for each IU. Select an IU and,

I When an indoor unit is selected and the Change button is tapped, the display changes to the Change auto-address screen (12).

II Tap the Set button to return to the screen (11) and display the new address.

III Tap the Finish button to register the new address.

In case of Multi series (KX) models, it is possible to let indoor units (Sub IUs) follow the operation mode (Heating, cooling) of the indoor unit (Main IU). Set the address of the Main IU to the Sub IUs. The Sub IUs to which the Main IU address is set follow the Main IU settings.

In case of 2 sets of indoor units (2 groups) connected to one R/C, it is available to perform back-up operation with them.

1. IU rotation: Operate 2 sets of indoor units alternately at every set time of operation interval.

2. IU capacity back-up: When the temp difference between the set temp and the actual room temp is higher than the set temp diff., 2 sets of indoor units operate.

3. IU fault back-up: If one of the IU has a fault and stops, the other one starts operation. Select Enable/Disable (tapping Disable changes to Enable) and tap the Enter button to confirm the settings.
For customers who adapt a motion sensor, please proceed the setting shown on the left and enable the indoor unit to be used to detect the activity amounts of persons.

When the motion sensor is disabled, activity amounts of persons will not be detected and thus the motion sensor control (power saving and auto-off) will not be performed.

For indoor units without a motion sensor, tap the Motion sensor setting to display "Invalid request."

In IU rotation function, the timer to changeover the operation of 2 indoor units is set.

The timer can be set within the range of 1 to 999 hours in increments of ten hours.

After the time is changed, tap Set for temporary setting.

After temporary setting, return to the IU Back-up function screen and tap Enter.

The difference between the setting temperature for a change between one unit and two units for capacity back-up and room temperature is set.

The temperature can be set within the range of 2 to 5 °C in increments of 1 °C.

After the temperature is changed, tap Set for temporary setting.

After temporary setting, return to the IU Back-up function screen and tap Enter.

Back-up control restrictions

1. The back-up control is unavailable when the operation mode is "Auto". When the back-up control is set for the air conditioner that specifies "Auto" for the operation mode, the operation mode changes to "Cooling" automatically.
2. When the rotation control is set, the fault back-up control will be enabled automatically. In this case, the fault back-up control cannot be disabled alone. When the rotation operation is disabled, the fault back-up control will also be disabled.
3. When the capacity back-up control is set, the fault back-up control will be enabled automatically. In this case, the fault back-up control cannot be disabled alone. When the capacity back-up control is disabled, the fault back-up control will also be disabled.
4. It is also possible to enable the fault back-up control alone.
5. The home leave mode, warming up and external input cannot be set together with the back-up control.
6. While the rotation or fault back-up control is set, either of the two target indoor units (two groups) will operate. Both units will not operate at the same time.
7. An indoor unit having younger address will start the operation first in each control.

Select Enable/Disable for the motion sensor of the indoor unit connected to the R/C.
10. R/C function settings

Advice: It is valid when unit stops.

Thermo. rule is applied based on the temperature detected with the return air temp sensor of IU.

When plural indoor units are connected to one R/C, the return air temp applied to the thermo. rule can be selected.

1. Individual: Thermo. rule is applied based on the return air temp of each IU. When plural units are connected to one R/C, it is based on the return air temp of the main unit.

2. Master IU: Thermo. rule is applied based on the return air temp of IU having the youngest address out of IUs connected.

If there are several sets of plural units each of which is connected to one R/C, it is based on the IU having the youngest address out of the main units of each plural units.

3. Averaged temp: Thermo. rule is applied based on the average of return air temperatures of IUs connected.

⑥ R/C sensor

R/C sensor

Back

You can change IU main unit return air temperature sensor to the R/C side.

Disable: The Indoor temp display changes to the temperature measured by the sensor at the main unit. ⇒ ⑦

Enable: The Indoor temp display changes to the temperature measured by the R/C side sensor. ⇒ ⑧

Enable(Heating only): The Indoor temp display changes to the temperature measured by the R/C side sensor during heating only.

Enable(Cooling only): The Indoor temp display changes to the temperature measured by the R/C side sensor during cooling only.

-18-
Operation mode

Enable or Disable can be set for each operation mode. If the cooling or heating is disabled, the auto is also disabled.

Adjustment in cooling

The R/C sensor detection temperature during cooling operation can be corrected. Set the value within the range of -3 to +3.

Adjustment in heating

The R/C sensor detection temperature during heating operation can be corrected. Set the value within the range of -3 to +3.

°C/°F

Select the unit of temperature displayed on the R/C.

Fan speed

Fan speed can be changed to the selected one. It may not be available to select some of fan speeds depending on indoor unit models.

External input

Set the range to apply the external input received through CNT of either one IU to plural indoor units connected in one system.

Individual: This is applied only to the IU receiving CNT input.

All units: This is applied to all indoor units connected.
Stop at fixed position The upper/lower flap can be set to stop at one of four positions.
Stop at any position The flap can be set to stop at any position immediately after operating the R/C switch.

Fixed position stop The left/right flap can be set to stop in eight different patterns.
Stop at any position The flap can be set to stop at any position immediately after operating the R/C switch.

If the unit stops during operation, Enable It returns to the state before the power failure as soon as the power supply is restored (After the end of the primary control at the power on). Disable It stops after the restoration of power supply.

Enable Auto can be selected on the room temperature setting screen. Disable Auto selection switch will not be displayed on the room temperature setting screen.

Enable Auto can be selected on the fan speed setting screen. Disable Auto selection switch will not be displayed on the fan speed setting screen.
11. IU settings

Advice: It is valid when unit stops.

When plural indoor units are connected, they are displayed on the screen.

- Individual settings are performed for indoor units.
- The same setting applies to all units.

The selected screen is displayed.

Set the fan speed tap for the IU. Refer to the engineering data for details.
Set the time to display the filter sign.

Operates in all modes.

Operate in standard & fan

Operates in cooling, dry and fan modes.

Intermittent fan operation in heating

Stop

Intermittent fan operation is not done.

Stop for 20 min & run for 5 min

Check the operating conditions at every 25 min and run the fan for 5 min.

Stop for 5 min & run for 5 min

Check the operating conditions at every 10 min and run the fan for 5 min.

Fan circulator operation

Enable

During the fan operation, the fan runs and stops based on the difference between temperatures detected with the R/C sensor and the return air sensor.

Disable

During the fan operation, the fan runs continuously.

Control pressure adjust

Standard

Type 1

When all operating IUs are in this mode, the control pressure value is changed.

Set this when operating the fan as a circulator. During the fan operation, the fan runs continuously.
The method of switching between cooling and heating in the auto operation mode can be selected from three options. Set the condition for each method.

**Auto 1**

The temp difference between the set temp and the actual room temp switch cooling and heating.

**Auto 2**

The temp difference between the set temp and the actual room temp/outdoor temp switch cooling and heating.

**Auto 3**

The actual room temp and outdoor temp switch cooling and heating.

---

**Auto 1 details**

Set the temperatures switching to cooling and heating.

Switching temperatures can be set within the range of 1°C to 4°C.

- [Set temp - Temp switching to cooling] < [Indoor return air temp] ⇒ Operation mode: Cooling
- [Set temp + Temp switching to heating] > [Indoor return air temp] ⇒ Operation mode: Heating

---

**Auto 2 details**

Set the temperatures switching to cooling and heating and the outdoor temp settings to limit in cooling and heating.

- [Set temp - Temp switching to cooling] < [Indoor return air temp] and [Outdoor temp, cooling] < [Outdoor air temp] ⇒ Operation mode: Cooling
- [Set temp - Temp switching to cooling] < [Indoor return air temp] and [Outdoor temp, cooling] > [Outdoor air temp] ⇒ Operation mode: Heating

---

**Auto 3 details**

Set the condition for each method.

- Select the item.
Set the outdoor temp settings to limit in cooling and heating and the indoor temp settings to limit in cooling and heating.

"[Indoor temp, cooling] < [Indoor return air temp] and 
"[Outdoor temp, cooling] < [Outdoor temp]" ⇒ Operation mode: Cooling

"[Indoor temp, heating] > [Indoor return air temp] and 
"[Outdoor temp, heating] > [Outdoor temp]" ⇒ Operation mode: Heating

Set the temperature switching to cooling with Auto 1 and Auto 2. 
The temperature can be set within the range of 1 to 4 °C.

Set the temperature switching to heating with Auto 1 and Auto 2. 
The temperature can be set within the range of 1 to 4 °C.

Set the outdoor temperature for heating with Auto 2 and Auto 3. 
The temperature can be set within the range of 10 to 22 °C.

Set the outdoor temperature for cooling with Auto 3. 
The temperature can be set within the range of 10 to 22 °C.

Set the indoor temperature for heating with Auto 3. 
Indoor temp, cooling: Can be set within the range of 18°C to 30°C.

Set the indoor temperature for heating with Auto 3. 
The temperature can be set within the range of 10 to 30 °C.
Auto fan speed control

Set the switching range of the fan tap at the auto fan speed setting.

Auto 1
The fan tap is changed in the range of High ⇒ Medium ⇒ Low.

Auto 2
The fan tap is changed in the range of Powerful high ⇒ High ⇒ Medium ⇒ Low.

Cooling offset

Heating offset

Thermo. rule setting

Standard/Outdoor temp basis

Set the room temperature control, thermostat ON/OFF switching method and condition.

Standard
The thermostat judges based on the indoor temperature and set temperature.

Outdoor temp basis
The thermostat judges based on the outdoor temperature and the cooling and heating offset values.

The room temperature setting will be disabled.

Back

Select the item.
When the room temperature differs to some extent from the setting temperature at 30 minutes after the start of operation, the overload alarm signal is transmitted from the external output (CNT-5).

The following shows output connectors and defaults.

- **External output function**: Select the output destination to change and then select the function to be allocated to the selected output.

  - **External output 1**
    - CNT-2 Operation output
  - **External output 2**
    - CNT-3 Heating output
  - **External output 3**
    - CNT-4 Compressor ON output
  - **External output 4**
    - CNT-5 Inspection (Error) output

  Refer to the engineering data for details.

### External output function #2

- **Fan operation output 1**
- **Fan operation output 2**
- **Fan operation output 3**
- **Defrost/oil return output**
- **Ventilation output**

### External output function #3

- **Heater output**
- **Free cooling output**
- **Indoor unit overload alarm output**
- **Reinforcement tower top output**

12. Service & Maintenance

TOP screen → Service setting → Service & Maintenance → Service password

① Service & Maintenance #1

Select the item.
The selected screen is displayed.

② Service & Maintenance #2

Select the item.
The selected screen is displayed.

③ IU address

When 8 or more units are connected, further data are displayed on the next page. When the Check button is tapped after selecting an IU address, the fan of the selected IU can be operated. ⇒④

④ Check run mode

Tap [Run] to check.
Tap [Stop] to stop the fan operation.

⑤ Next service date

When next service date is entered, messages are displayed at the start/stop of operation on the service month. Contents are reset if the next service date is updated. If the No setting button is tapped, messages are not displayed.

⑥ Service message

After read the indoor unit data, the operation data at the time of reading are displayed. Tapping the Display button to update the data. To automatically update data and display, up to six items can be selected. Tapping the Display button after selecting six items changes the display to ⑬.
### Operation data #4

</tbody>
</table>

Date and time when error occurred, IU address and Error Code are displayed. Tap the Delete button to delete the error history.

The operation data obtained just before the occurrence of an error are displayed.
The operation data obtained just before the occurrence of an error are displayed.

The anomaly data is erased.

Set the time when the automatic saving is performed everyday. If the [No setting] button is tapped, the automatic saving is not performed.

Advice
Have you ever lost setting contents after replacing an IU board? When IU settings are saved in the R/C, the saved data can be written to IU using "Transfer the saved data".
Use this when the display and the touch position are not matched.
Tap the center of [+] and check the deviation from the display.
Finish ⇒ Calibration is completed.

 Capacities of IUs connected to the R/C are displayed.
When seven units or more are connected, tap the Next button to view all.
These items may not be displayed depending on the combination of IUs and OUs.
13. Select the language

[Selecting the language with the [button]]

① Select the language #1

Tap the [button] on the TOP screen while the air conditioner is stopped.

Depending on how the Permission/Prohibition setting (Refer to user’s manual) is set, the administrator password input screen may be displayed.

② Select the language #2

The menu for select the language is displayed. Select the language to be displayed on the R/C and tap the [Set] button.

You can select from the following languages: English/German/French/Spanish/Italian/Dutch/Turkish/Portuguese/Russian/Polish/Japanese/Chinese

[Selecting the language with the button]

TOP screen Menu ⇒ Useful functions ⇒ Select the language

The menu for select the language is displayed.

Select the language to be displayed on the R/C and tap the [Set] button.

You can select from the following languages: English/German/French/Spanish/Italian/Dutch/Turkish/Portuguese/Russian/Polish/Japanese/Chinese
